**2010 THIRD QUARTER REPORT** 

### MANAGEMENT'S DISCUSSION AND ANALYSIS

Eurogas International Inc. ("Eurogas International" or the "Corporation") is an independent oil and gas company, incorporated under the *Companies Act* (Barbados), engaged in exploration and evaluation on its extensive landholdings offshore Tunisia, targeting large scale oil and natural gas reserves. The Corporation holds a 45% working interest, and is the non-operating partner, in the Sfax offshore exploration permit (the "Sfax Permit") covering 908,425 acres located in the shallow Mediterranean waters in the Gulf of Gabes, offshore Tunisia and southeast of the city of Sfax. The Corporation's common shares are traded on the Canadian National Stock Exchange ("CNSX") under the symbol EI.

This interim management's discussion and analysis has been prepared with an effective date of October 22, 2010 and provides an update on matters discussed in, and should be read in conjunction with the audited financial statements of the Corporation, including the notes thereto, as at and for the year ended December 31, 2009 (the "2009 Audited Financial Statements") and the unaudited interim financial statements as at and for the three and nine months ended September 30, 2010 (the "September 2010 Interim Financial Statements"). All amounts are in Canadian dollars unless otherwise specified. Financial data has been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"), unless otherwise specified.

### FORWARD-LOOKING STATEMENTS

Certain information set forth in this document, including management's assessment of the Corporation's future plans and operations, contains forward-looking statements. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or similar expressions. By their nature, forwardlooking statements are subject to numerous risks and uncertainties, some of which are beyond the Corporation's control, including the impact of general economic conditions, industry conditions, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other industry participants, the lack of availability of qualified personnel or management, stock market volatility, the ability to access sufficient capital from internal and external sources, and other risk factors discussed or referred to in the section entitled "Business Risks" in the Corporation's management's discussion and analysis accompanying its 2009 Audited Financial Statements and other documents filed from time to time with the securities administrators, all of which may be accessed at www.sedar.com. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Corporation's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements and accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what resulting benefits the Corporation will derive. The Corporation disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

### BUSINESS DEVELOPMENTS

### **Sfax Offshore Exploration Permit**

Eurogas International is currently conducting exploration and evaluation programs for oil and natural gas offshore Tunisia in the Gulf of Gabes, where it holds its interest in the Sfax Permit.

The Corporation is a non-operating partner in the Sfax Permit. In order to carry out its business activities, the Corporation entered into a joint operating agreement with Atlas Petroleum Exploration Worldwide Ltd. ("APEX"), pursuant to which the Corporation and APEX agreed to undertake exploration, evaluation and

extraction operations pursuant to the working interest awarded to them in the Sfax Permit. APEX is the operating partner in the joint venture arrangement.

The Sfax Permit lies within a hydrocarbon fairway that trends from offshore Libya, through the Gulf of Gabes, to onshore Tunisia and includes major oil and gas fields. The Sfax Permit is surrounded by producing oil and gas fields to the west, north and east, including the 330 million barrel Ashtart oil field that lies along the southeast boundary. Previous operators drilled and flow tested oil from three separate structures on the Sfax Permit at daily equivalent rates of 612, 1,200 and 1,800 barrels of oil per day. At that time, these structures were considered sub-economic to those operators and the wells were abandoned.

Following the granting of the Sfax Permit in 2004, the Corporation and APEX acquired a new 3-D seismic program over approximately 340 km<sup>2</sup> of the Sfax Permit, which included the known Ras-El-Besh and Jawhara prospects that tested oil. The seismic data provided an improved understanding of the geology.

During 2005, the Sfax Permit was converted to an exploration permit under the terms of a production sharing contract. The four year exploration permit commenced December 9, 2005 and included a commitment to undertake seismic work, which has been completed, and to drill one exploration well prior to December 9, 2009. The Ras-El-Besh well (see "Ras-El-Besh Concession") was the commitment well for the Sfax Permit. On January 19, 2009, the Tunisian Hydrocarbon Committee approved a two-year extension to the Sfax Permit, which will extend the primary term to December 8, 2011. As a condition of the extension, the Corporation and its joint venture partner committed to drill an additional exploration well on the Sfax Permit during the extension period.

The Corporation, on behalf of the joint venture, is overseeing the reprocessing of four 3-D seismic surveys on the Sfax Permit. The 340 km² Sfax program over the Ras-El-Besh and Jawhara oil prospects was completed and mapping has commenced. The 60 km² and 460 km² programs for Salloum and the Kerkennah Banks, have been completed and interpretation has commenced. The older Ashtart 3-D survey is currently being reprocessed. Selected 2-D seismic lines have also been reprocessed to support the mapping of prospects and leads on the Sfax Permit. The Corporation, together with its joint venture partner, is currently using the reprocessed data to remap the prospects and leads in order to determine a future course of action with respect to the drilling of an exploration well to satisfy the outstanding drilling obligation.

### **Ras-El-Besh Concession**

In December 2005, the Corporation and APEX applied for a development concession over the Ras-El-Besh ("REB-3") prospect within the Sfax Permit. The application was accepted by the Hydrocarbon Committee of the Tunisian government in July 2006 and the concession was gazetted on September 5, 2008 following commencement of drilling the REB-3 well on June 16, 2008. The REB-3 well is recognized by the Tunisian government as the commitment well under the initial term of the Sfax Permit, which ended on December 9, 2009.

The REB-3 well reached total depth of 2,204 metres. Well logs and formation pressure tests identified the presence of oil in a high quality, 10-metre thick carbonate interval in the Reineche formation, which was subsequently confirmed by down-hole sampling. The well was plugged back and drilled horizontally to 3,284 metres. The sidetrack intercepted the top of the Reineche formation in a lower fault block located 1,000 metres to the northwest of the REB-3 well, then drilled horizontally through 400 metres of porous formation. The horizontal section was tested and produced over 1,000 barrels per day of water and oil with a 10% cut of 27° API oil.

Upon completion of drilling and testing the REB-3 well, the joint venture partners requested and received approval from the Tunisian government to temporarily suspend the well and release the drilling rig, both of which were done. Agreement by the Tunisian government was subject to the reinterpretation and remapping of

seismic data, after which the joint venture partners must decide to either reenter or abandon the well. This assessment is currently being conducted. In the event of abandonment, the total cost to the joint venture is estimated at between US\$6.5 million to US\$10 million. Actual costs will depend on factors such as the mobilization and demobilization cost of the rig and prevailing rates.

### **Mobile Offshore Production Unit**

The Corporation holds an interest in a mobile offshore production unit ("MOPU") through its 45% investment in Innovative Production Services Ltd., which was acquired with the expectation of producing, processing and transporting oil on certain development concessions on the Sfax Permit. The joint venture partners are currently evaluating alternative usage of the MOPU, including the monetization of the asset through a possible sale or lease arrangements.

### Agreement with Delta Hydrocarbons B.V.

On April 7, 2008, the Corporation and APEX entered into a farmout agreement with Delta Hydrocarbons B.V. ("Delta") whereby Delta acquired a 50% participation in the Sfax Permit, including the Ras-El-Besh development concession as well as a 50% interest in the MOPU, subject to a commitment to spend US\$125 million, including a cash payment to the Corporation of \$11.2 million.

In May 2009, Delta expressed a desire to exit from the farmout agreement. Under a settlement agreement, Delta reassigned its 50% participating interest to APEX and the Corporation. In exchange, Delta is entitled to a portion of certain payments, if and when received by the joint venture, including a share of the proceeds from the cost oil portion of any future production revenues from the Sfax Permit and a share of the proceeds from any sale or lease of the MOPU, to a maximum of US\$20 million. Delta's entitlement pursuant to the settlement agreement is conditional on Delta meeting its obligations as defined in the settlement agreement, including Delta's commitment to fund 50% of any costs associated with certain asset retirement obligations until December 8, 2011, as well as to fund its pro-rata share of ongoing costs associated with the Seawolf Litigation (see below).

Capital expenditures, during the period of the farmout agreement, were funded directly by Delta pursuant to its spending commitment. Subsequent to the reassignment of Delta's participating interest, the Corporation's participating interest in the Sfax Permit, the Ras-El-Besh development concession and the MOPU was 45% and APEX's participating interest was 55%. Accordingly, the Corporation is responsible for 45% of ongoing capital expenditures related to these activities.

### The Seawolf Litigation

APEX, as operator under the Sfax joint venture, commenced arbitration proceedings against Seawolf Oilfield (Cyprus) Limited and Seawolf Oilfield Services Limited (collectively, "Seawolf") under the rules of the London Court of International Arbitration. APEX, on behalf of the joint venture, filed a statement of case seeking damages for misrepresentations and breach of a drilling contract in respect of the REB-3 well, as well as payment of indemnities under the contract. Seawolf responded by filing a counterclaim. On May 20, 2010, the parties announced settlement of the arbitration proceedings which provides for the payment, by Seawolf to the joint venture, of US\$12 million over an 18 month period. The settlement amount is secured by a letter of guarantee issued by a recognized international bank. As at September 30, 2010, Seawolf had paid US\$3.3 million towards payment of amounts outstanding pursuant to the settlement, all of which has been deposited to an escrow account.

The Corporation's interest in the escrow account is subject to final determination under its joint venture agreement with APEX and the joint venture's farmout and settlement agreements with Delta, but will be no less than 22.5%, and may reach a maximum of 45% of settlement proceeds. For accounting purposes, the Corporation will recognize its interest in the aggregate settlement proceeds when the terms for release of funds

from the escrow account have been determined, at which time they will be recorded as a reduction in the carrying value of the Corporation's interest in oil and natural gas properties.

### 2010 Expenditures - Tunisian Asset Pool

The Corporation's proportionate share of costs associated with the Sfax Permit are capitalized as part of the preproduction phase of operations. During the three and nine months ended September 30, 2010, an aggregate of \$0.5 million and \$2.5 million, respectively (three and nine months ended September 30, 2009 - \$1.0 million and \$3.1 million, respectively) was capitalized to the Tunisian asset pool, including Ras-El-Besh expenditures and expenses relating to the renovation and upgrade of the MOPU.

	Three months ended	Nine months ended
	30-Sep-10	30-Sep-10
Opening balance	\$ 23,207,534	\$ 21,175,897
Transactions during the period		
Sfax Permit	393,286	1,292,548
Ras-El-Besh expenditures, net	68,614	439,123
Mobile offshore production unit "Ocean Patriot"	47,647	809,513
Closing balance	\$ 23,717,081	\$ 23,717,081

### Work Program for 2010

The estimated budget for the Sfax Permit and the Ras-El-Besh development concession during the remainder of 2010 is US\$0.9 million, of which Eurogas International is responsible for its net share of US\$0.4 million.

Following the results of the REB-3 well, the joint venture partners are reevaluating the Ras-El-Besh concession area and north of it covering both the Reineche and the El Garia formations. The work program for the remainder of 2010 consists of geological, geophysical and engineering analysis to evaluate both the Salloum and Jawhara oil prospects as future drilling candidates for the Sfax Permit. The Salloum structure is located in the northeast corner of the Sfax Permit in shallow waters adjacent to the city of Sfax and is adjacent to two producing oil fields that produce from the same targeted formation. Our geotechnical studies indicate that the prospect may be drilled from an onshore location. The Jawhara structure is located in the center of the Sfax Permit in approximately 28 metres of water. Seismic interpretation has identified a large north south elongate structure with the Curetaceous Bireno formation being the primary prospect.

### RESULTS OF OPERATIONS

For the nine months ended September 30, 2010 compared with the nine months ended September 30, 2009

The Corporation's current energy project is in the exploration stage and therefore, the Corporation does not generate operating revenues.

During the nine months ended September 30, 2010, the Corporation incurred a net loss of \$2.2 million, or a loss of approximately \$0.07 per share. This compares with a net loss of \$2.7 million, or a loss of \$0.09 per share in the nine months ended September 30, 2009.

Revenues in the nine months ended September 30, 2010 were \$5,504 and consisted primarily of interest revenue earned on the Corporation's cash and short term investments. Revenues in the same period of the prior year were \$119,270. The decrease in revenues reflects lower levels of cash and short term investments.

Expenses incurred during the nine months ended September 30, 2010 were \$2.2 million (nine months ended September 30, 2009 - \$2.8 million), including \$1.0 million (nine months ended September 30, 2009 - \$1.0 million) associated with the Corporation's Series A Preference Shares outstanding.

General and administrative expenses incurred during the nine months ended September 30, 2010 were \$1.2 million, remaining relatively consistent with general and administrative expenses incurred in the same period of 2009. General and administrative expenses in the first nine months of 2010 include \$0.8 million (nine months ended September 30, 2009 - \$0.6 million) relating to the Corporation's ongoing involvement in the Seawolf litigation.

Depreciation and accretion expense during the nine months ended September 30, 2010 was \$68,683 (nine months ended September 30, 2009 - \$443,961) and included amounts related to the MOPU and to the reclamation costs associated with the REB-3 well.

# For the three months ended September 30, 2010 compared with the three months ended September 30, 2009

The Corporation incurred a net loss during the three months ended September 30, 2010 of \$0.6 million, or a loss of \$0.02 per share. This compares with a net loss of \$1.1 million, or a loss of \$0.03 per share during the three months ended September 30, 2009.

Interest revenues earned during the three months ended September 30, 2010 were \$1,103 compared with interest revenues of \$22,805 earned in the same period of the prior year. Consistent with the decrease in year-over-year interest revenues, this decrease reflects lower levels of cash and short term investments.

Expenses incurred during the third quarter of 2010 were \$0.6 million compared with expenses of \$1.1 million incurred during the third quarter of 2009. General and administrative expenses were \$0.3 million in the third quarter of 2010, a decrease of \$0.3 million in general and administrative costs from the comparative period of the prior year. The decrease results primarily from a decrease in legal costs associated with the Seawolf litigation which aggregated \$0.4 million in the third quarter of the prior year compared with \$0.2 million in the current quarter. Expenses in the third quarter of the prior year included depreciation and accretion costs of \$147,987 (three months ended September 30, 2010 - \$22,895) associated with reclamation costs on the REB-3 well. Furthermore, the Corporation incurred a foreign exchange loss of \$48,343 during the third quarter of the prior year, compared with a gain of \$17,546 earned in the third quarter of the current year.

#### SUMMARY OF OUARTERLY RESULTS

	September 30,	June 30,	March 31,	December 31,

Interest income	\$ . ,	\$ ,	\$ 	\$
Interest income Net loss	2009	\$ 2009	\$ 2009	\$ 2008

### LIQUIDITY AND CAPITAL RESOURCES

### **Cash Resource Availability**

At September 30, 2010, the Corporation had cash and short term investments of \$0.8 million compared with cash and short term investments of \$4.2 million at December 31, 2009.

The partners in the joint venture are pursuing a significant exploration, evaluation and drilling program. The primary plans for the Sfax Permit are to explore and evaluate and, if the evaluation results in economically viable reserves, to develop the prospect and leads. Management believes that its existing cash position as well as expected proceeds from the settlement of the Seawolf litigation is sufficient to meet the Corporation's immediate obligations. Any additional funding requirements would have to be accessed through debt or equity financings, farmout arrangements and/or bank borrowings. There can be no assurance that such funding or borrowing would be available to the Corporation.

### **Outstanding Share Data**

As at October 22, 2010, there were 31,143,635 common shares and 32,150,000 Series A Preference Shares outstanding.

### **COMMITMENTS**

As part of the Tunisian Hydrocarbon Committee's approval of a two-year extension on the Sfax Permit, which extends the primary term to December 8, 2011, the Corporation is committed to drilling one new exploration well during the extension period. The Corporation has not completed its estimate of the costs to meet this commitment as the costs are partially contingent on the selection of the prospect and location within the Sfax Permit.

#### RELATED PARTY TRANSACTIONS

Other than as described in Note 9 to the September 2010 Interim Financial Statements, there have been no significant changes in the nature and scope of related party transactions to those described in Note 11 to the 2009 Audited Financial Statements and the accompanying management's discussion and analysis.

### **BUSINESS RISKS**

The Corporation is currently in the exploratory and evaluation stage in Tunisia and therefore capitalizes all associated costs. The recovery of the recorded costs is contingent on the existence of economically recoverable reserves and future profitable production. The business and operations of the Corporation may require substantial additional capital in order to execute any further exploration and development work.

There are a number of other inherent risks associated with the Corporation's activities and with its current stage of exploration. These risks were detailed in the section entitled "Business Risks" in the Corporation's management's discussion and analysis accompanying its 2009 Audited Financial Statements. The Corporation has not identified any material changes to the risk factors affecting our business and our approach to managing those risks from those discussed in the document referred to above.

### ACCOUNTING POLICIES AND ESTIMATES

Certain accounting policies are critical to understanding the Corporation's results of operations and financial condition. The preparation of financial statements in accordance with Canadian GAAP requires management to make judgements and estimates on matters that are uncertain. These estimates affect the reported amounts of assets and liabilities as well as revenues and expenses. Changes to these estimates may result in material changes to the Corporation's results of operations or financial condition. The September 2010 Interim Financial Statements follow the same accounting principles and methods of application as those described in Note 2 to the Corporation's 2009 Audited Financial Statements. A summary of the more significant judgements and estimates

made by management is provided in the section entitled "Accounting Policies and Estimates" in the Corporation's management's discussion and analysis accompanying the 2009 Audited Financial Statements.

### FUTURE ACCOUNTING DEVELOPMENTS

### **International Financial Reporting Standards ("IFRS")**

In February 2008, CICA Accounting Standards Board (the "Canadian AcSB") confirmed that Canadian GAAP for publicly accountable enterprises will be converged with IFRS effective in calendar year 2011. IFRS uses a conceptual framework similar to Canadian GAAP, but there may be differences on recognition, measurement and disclosure that may materially impact the Corporation's financial statements. The implementation of IFRS will apply to the Corporation's interim and annual financial statements beginning on January 1, 2011, including the restatement of comparative amounts for 2010.

There have been no significant changes to the structure or timing of the Corporation's IFRS conversion program, which was described in greater detail in the Management's Discussion and Analysis for the three months ended March 31, 2010 ("Q1 MD&A"). The following disclosure is a program progress update for the third quarter ended September 30, 2010.

### Analysis of IFRS Accounting Policies Affecting the Corporation

### IFRS 1: First-time Adoption of IFRS

IFRS 1 provides the framework for the first-time adoption of IFRS and specifies that, in general, an entity shall apply the principles under IFRS retrospectively. IFRS 1 also specifies that the adjustments that arise on retrospective conversion to IFRS from Canadian GAAP should be directly recognized in retained earnings. Certain optional exemptions and mandatory exceptions to retrospective application are provided for under IFRS 1. While the Corporation continues to analyze the various accounting policy choices available under IFRS 1, certain tentative conclusions have been reached. The following is a preliminary assessment of transition exemptions expected to be relevant to the Corporation along with certain tentative conclusions:

- Oil and gas properties IFRS 1 allows a first-time adopter using the full cost method of accounting under its previous GAAP to elect to measure oil and gas assets at the date of transition to IFRS on the following basis: (a) exploration and evaluation assets at the amount determined under previous GAAP and (b) assets in the development or production phases at the amount determined under previous GAAP, allocated to the underlying assets pro rata using reserve volumes or reserve values as of that date as more fully described in the Q1 MD&A. In conjunction with the preparation of the Corporation's IFRS opening balance sheet as at January 1, 2010, the Corporation has tentatively concluded that its oil and gas properties, which include only exploration and evaluation assets, will be initially measured at the amount determined under Canadian GAAP, subject to IAS 36, as discussed below. The expected timeline for the completion of this analysis and conclusion has been reset to December 31, 2010.
- Share-based payments Under IFRS 1, a first-time adopter is not required to apply IFRS 2: Share-based Payments to equity instruments granted on or before November 7, 2002 or granted after November 7, 2002 but vested at the date of transition. The Corporation elected this exemption and only applies IFRS 2 to those equity instruments that were not vested as at January 1, 2010. During the third quarter of 2010, the Corporation determined that this election will not have a material effect on the Corporation's financial statements.

### IAS 36: Impairment of Assets

The Corporation is currently in the process of updating the impairment testing models to comply with the requirements of IAS 36. This process includes reviewing the organizational structure and sources of cash

inflows to define the Corporation's cash generating units ("CGUs") and revising its impairment models to reflect the IAS 36 concept of recoverable amount. The Corporation expects to have completed this analysis by December 31, 2010.

### IFRS 2: Share-based Payments

Equity-settled share-based payments are measured at grant-date fair value under both IFRS and Canadian GAAP. However, there are differences related to the timing of expense recognition under the respective standards that impact the Corporation's share-based payment programs. The Corporation has identified the specific differences in accounting for share-based payments under IFRS and amended its share-based payment models in order to quantify the impact upon transition. The Corporation has substantially completed this quantitative exercise and does not expect the changes to have a significant impact on its financial statements upon transition to IFRS.

### Internal Controls and Information Technology Systems

The impact on internal controls and information technology systems continues to be assessed in light of changes in both transaction-level accounting policies and changes in financial reporting disclosure requirements. Required changes identified to date are limited to the more granular tracking of oil and gas assets that will be required to address impairment testing and presentation and disclosure under IFRS. Management anticipates only minor updates to its internal controls and information technology systems to accommodate these changes.

### Financial Reporting Expertise

The personnel involved in the conversion process and those with ongoing financial reporting responsibilities continue to attend educational training sessions.

### Next Steps

The Corporation will continue to work on its assessment of the impact of IFRS adoption on the Corporation's accounting policies and related processes in the fourth quarter of 2010. Concurrent with this effort, the conversion committee will continue with its assessment of IFRS impacts on business activities and implement a communication strategy, as appropriate, aimed at all stakeholders, including employees, rating agencies, and shareholders, as may be appropriate to assist in their understanding of its transition to IFRS. The Corporation will continue to monitor results from the existing conversion plan, as well as ongoing changes to IFRS, and adjust our transition and implementation plans accordingly.

### CONTROLS AND PROCEDURES

In accordance with the Canadian Securities Administrators' National Instrument 52-109, the Corporation has filed certificates signed by the Chief Executive Officer and Chief Financial Officer certifying that, among other things, the design of disclosure controls and procedures and the design of internal control over financial reporting are adequate. The financial disclosure controls and procedures provide reasonable assurance that material financial information has been duly disclosed by the Corporation. Furthermore, internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of the Corporation's financial reporting and its compliance with Canadian GAAP in its financial statements.

The Chief Executive Officer and Chief Financial Officer of the Corporation have also evaluated whether there were changes to the Corporation's internal control over financial reporting during the nine months ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect the Corporation's internal control over financial reporting. No changes were identified during their evaluation.

It should be noted that while the Corporation's Chief Executive Officer and Chief Financial Officer believe that the Corporation's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that the disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objective of the control system is met.

# ADDITIONAL INFORMATION

Additional information relating to the Corporation may be accessed through the System for Electronic Document Analysis and Retrieval ("SEDAR") at <a href="https://www.sedar.com">www.sedar.com</a>.

The accompanying notes are an integral part of these interim financial statements.

### **Notes to the Financial Statements**

As at and for the three and nine months ended September 30, 2010 and 2009 (Unaudited)

### 1. NATURE OF OPERATIONS

Eurogas International Inc. ("Eurogas International" or the "Corporation") is incorporated under the *Companies Act* (Barbados), and is an independent oil and gas company engaged in the exploration and evaluation of its landholdings offshore Tunisia, targeting large-scale oil and natural gas reserves.

The recoverability of amounts expended by the Corporation on its Tunisian landholdings is dependent upon the discovery of economically recoverable reserves, obtaining exploitation concessions for those reserves identified, the ability to obtain necessary financing to complete development, and future profitable production or proceeds from disposition.

The Corporation's ability to continue its operations and realize assets at their carrying values is dependent upon the continued support of its shareholders, obtaining additional financing and generating revenues sufficient to cover its operating costs. These interim financial statements have been prepared on the basis that the Corporation will, in the foreseeable future, be able to meet its commitments, continue operations, realize its assets and discharge its liabilities in the normal course of business.

### 2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION

These interim financial statements of Eurogas International have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). All amounts are in Canadian dollars unless otherwise specified.

These interim financial statements follow the same accounting principles and methods of application as those disclosed in Note 2 to the Corporation's audited financial statements as at and for the year ended December 31, 2009 (the "2009 Audited Financial Statements"). The Corporation's interim financial statements do not include all disclosures required by Canadian GAAP for annual financial statements and accordingly, should be read in conjunction with the 2009 Audited Financial Statements.

The preparation of interim financial statements in accordance with Canadian GAAP requires management to make estimates and assumptions that may affect the reported amounts of assets and liabilities, the disclosure of contingencies as at the date of the interim financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are made based on information available as at the date of issuance of these interim financial statements. Actual results could differ from those estimates.

### **Comparative Figures**

Certain comparative figures have been reclassified to conform with current period financial statement presentation.

### 3. SHORT TERM INVESTMENTS

		Weighted	Weighted
		Average	Average
	Fair	Interest	Days to
Guaranteed Investment Certificates	Value	Rate	Maturity
Balance, December 31, 2009	\$ 4,005,040	0.40%	259
Transactions in the period ended September 30, 2010			
Redemptions	(4,020,338)	0.40%	n/a
Investments	800,000	0.70%	n/a
Fair value adjustments	5,526	n/a	n/a
Balance, September 30, 2010	\$ 790,228	0.70%	350

At September 30, 2010, the Corporation held guaranteed investment certificates ("GICs") from a Canadian Schedule I Chartered Bank with a par value of \$790,000. Unrealized appreciation in the fair value of short term investments at September 30, 2010 was \$228 (December 31, 2009 – \$5,040).

### 4. OIL AND NATURAL GAS PROPERTIES

	Three months	Nine months	Year
	ended	ended	ended
	30-Sep-10	30-Sep-10	31-Dec-09
Opening balance	\$ 23,207,534	\$ 21,175,897	\$ 17,819,331
Transactions during the period			
Sfax Permit	393,286	1,292,548	1,880,051
Ras-El-Besh expenditures, net	68,614	439,123	(81,615)
Mobile offshore production unit "Ocean Patriot"	47,647	809,513	1,558,130
Closing balance	\$ 23,717,081	\$ 23,717,081	\$ 21,175,897

Aggregate capital expenditures in respect of the Corporation's exploration and evaluation activities on its Tunisian oil and gas properties during the three and nine months ended September 30, 2010, amounted to \$509,547 and \$2,541,184, respectively (three and nine months ended September 30, 2009 - \$955,258 and \$3,089,185, respectively).

During 2008, Eurogas International, together with its joint venture partner, Atlas Petroleum Exploration Worldwide Ltd. ("APEX"), entered into a farmout option agreement with Delta Hydrocarbons B.V. ("Delta"), pertaining to the farmout of the Sfax Permit and the Ras-El-Besh ("REB-3") concession in Tunisia. Under the farmout option agreement, Delta had acquired a 50% interest in the Sfax joint venture and related contracts in exchange for expending US\$125 million. Capital expenditures during the period of the farmout option agreement were substantially funded by Delta pursuant to its spending commitment.

In May of 2009, Delta expressed a desire to exit from the joint venture and the farmout option arrangement. Under a settlement agreement, Delta reassigned its 50% interest in the Sfax joint venture and related contracts, in exchange for a portion of certain payments, if and when received by the joint venture, to a maximum of US\$20 million.

Payments to Delta pursuant to the settlement agreement may include a share of the proceeds from the cost oil portion of any future production revenues realized from the Sfax Permit and the Ras-El-Besh development concession and a share of the proceeds from any sale or lease of the mobile offshore production unit. Furthermore, Delta remains committed to fund 50% of any costs associated with certain retirement obligations until December 9, 2011.

# Settlement of Arbitration Against Seawolf Oilfield (Cyprus) Limited and Seawolf Oilfield Services Limited

In 2009, APEX, on behalf of the joint venture partners, commenced arbitration proceedings against Seawolf Oilfield (Cyprus) Limited and Seawolf Oilfield Services Limited, seeking damages for misrepresentations and breach of a drilling contract in respect of the REB-3 well. In May 2010, the parties reached a settlement agreement, which provides for the payment to the joint venture, of US\$12.0 million over an 18 month period. The settlement amount is secured by a letter of guarantee issued by a recognized international bank. The Corporation's interest in the settlement proceeds is subject to final determination under its joint venture agreement but will be no less than 22.5% of the aggregate proceeds and may reach a maximum of 45%. Settlement proceeds, when received, will be recorded as a reduction in the carrying value of the Corporation's interest in oil and natural gas properties.

### 5. ASSET RETIREMENT OBLIGATION

	Т	Three months		Nine months	Year
		ended		ended	ended
		30-Sep-10		30-Sep-10	31-Dec-09
Opening balance	\$	1,648,379	\$	1,602,591	\$ 1,202,068
Revisions to estimated cash flows		-		-	313,897
Accretion		22,895		68,683	86,626
Closing balance	\$	1,671,274	\$	1,671,274	\$ 1,602,591

Upon completion of drilling and testing the REB-3 well within the Ras-El-Besh prospect and the associated development concession, the joint venture partners requested and received approval from the Tunisian government to temporarily suspend the well and release the drilling rig. The joint venture must either abandon or re-enter the REB-3 well within certain timeframes as outlined by the Tunisian government. The joint venture has estimated that the aggregate costs required in the event of abandonment of the REB-3 well is between US\$6.5 million and US\$10 million. The Corporation has recorded an asset retirement obligation in respect of its share of the potential obligation in the event of abandonment of the REB-3 well.

The key assumptions for the carrying amount of the asset retirement obligation include:

- Total estimated undiscounted cash flows at September 30, 2010 of \$1,790,978 (December 31, 2009 \$1,790,978)
- Expected settlement in fiscal 2011; and
- Credit adjusted risk free rate at which the estimated payments have been discounted of 5.7% (December 31, 2009 5.7%).

### 6. PREFERENCE SHARES

During the three and nine months ended September 30, 2010, the Corporation recognized an expense of \$324,142 and \$961,857, respectively (three and nine months ended September 30, 2009 - \$334,917 and \$965,585, respectively) in net earnings, representing the dividends accrued on the Series A

Preference Shares. The holder of the Series A Preference Shares has indicated to the Corporation that it does not intend to exercise its redemption entitlement until December 2011, and it has also agreed to accept the deferral of the payment of cumulative dividends, of \$2,771,393 (December 31, 2009 – \$1,809,536) thereon until December 2011.

### 7. SHARE CAPITAL

	Number of		Contributed
	Shares	Capital	Surplus
Outstanding, December 31, 2008	31,143,635	\$ 1	\$ -
Transactions during the year ended December 31, 2009			
Stock based compensation	-	-	9,287
Outstanding, December 31, 2009	31,143,635	\$ 1	\$ 9,287
Transactions during the nine months ended September 30, 2010			
Stock based compensation	=	-	4,488
Outstanding, September 30, 2010	31,143,635	\$ 1	\$ 13,775

The Corporation is authorized to issue an unlimited number of common shares. At September 30, 2010, the Corporation had 31,143,635 common shares issued and outstanding.

### Stock Based Compensation

On June 15, 2009, the Corporation issued 600,000 stock options with an exercise price of \$0.10 per option, to directors of the Corporation. One third of the options vested immediately at issuance with the remaining options vesting as to 50% on each of June 15, 2010 and June 15, 2011. The options expire on June 15, 2014. On September 30, 2010, all 600,000 options remained outstanding, including 400,000 options which have vested.

Aggregate stock based compensation expense in respect of these stock option awards during the three and nine months ended September 30, 2010 was \$1,512 and \$4,488, respectively (three and nine months ended September 30, 2009 - \$1,512 and \$7,775, respectively).

### 8. NET LOSS PER SHARE

For the three and nine months ended September 30,				
		Three months		Nine months
	2010	2009	2010	2009
Net loss attributable to shareholders	\$ (581,369) \$	(1,062,975)	\$ (2,241,535) \$	(2,664,764)

common shares outstanding	31,143,635	31,143,635	31,143,635	31,143,635
Basic and diluted net loss per share	\$ (0.02) \$	(0.03)	\$ (0.07) \$	(0.09)

## 9. RELATED PARTY TRANSACTIONS

The \$564,768 (December 31, 2009 - \$150,882) payable to Eurogas Corporation, the holder of the Corporation's Series A Preference Shares, is due on demand, is unsecured and is non-interest bearing.

During the first quarter of the prior year, the Corporation entered into a services arrangement with Dundee Resources Limited, a wholly owned subsidiary of Dundee Corporation. Dundee Corporation is the principal shareholder of the Corporation. The services agreement with Dundee Resources Limited provides the Corporation with administrative support services as well as geophysical, geological and engineering consultation with regard to the Corporation's activities. During the three

and nine months ended September 30, 2010, the Corporation incurred costs of \$44,744 and \$263,093, respectively (three and nine months ended September 30, 2009 - \$76,460 and \$219,665, respectively), in respect of these arrangements.

### 10. COMMITMENTS

There have been no substantive changes to the description and nature of commitments from those described in Note 12 to the Corporation's 2009 Audited Financial Statements.

### 11. FINANCIAL INSTRUMENTS

Detailed disclosures on the Corporation's financial instruments are included in Note 13 to the 2009 Audited Financial Statements.

### Fair Value of Financial Instruments

At September 30, 2010, the Corporation's investment in GICs was the only financial instrument carried on the balance sheet at fair value. The investment is short term in nature and is accordingly valued at cost plus accrued interest, which approximates fair value. The valuation methodology used by the Corporation in its assessment of fair value includes an assessment of assets in quoted markets with similar interest rates and terms to maturity.

### Risk Management

The Corporation's financial instruments are exposed to financial risks due to the nature of the Corporation's business and the financial assets and liabilities that the Corporation holds. A detailed description of the nature of these risks is provided in Note 13 to the 2009 Audited Financial Statements. In general, for every 50 basis point increase in market interest rates, net earnings before income taxes would increase by approximately \$6,800 and conversely, a 50 basis point decrease in market interest rates would decrease net earnings before income taxes by \$5,500.

### 12. FUTURE ACCOUNTING DEVELOPMENTS

### Implementation of International Financial Reporting Standards

In February 2008, the AcSB affirmed that Canadian GAAP for publicly accountable enterprises will be converged with IFRS effective in calendar year 2011. The implementation of IFRS will apply to the Corporation's interim and annual financial statements beginning on January 1, 2011, including the restatement of comparative amounts for 2010. As a result, the Corporation will publish its first financial statements, prepared in accordance with IFRS, for the quarter ended March 31, 2011.

While IFRS standards are premised on a conceptual framework similar to Canadian GAAP, there are differences in the areas of recognition, measurement and disclosure that may materially impact the Corporation's financial statements. The Corporation is participating in the IFRS implementation committee of its parent company and it has completed an assessment to identify the key accounting differences between Canadian GAAP and IFRS. The impact of these differences to the Corporation's financial results at the time of transition and on implementation is currently being assessed. Based on existing IFRS standards, significant differences to Canadian GAAP that may materially impact the Corporation's financial results include, but are not limited to, accounting for oil and gas assets and impairment of assets. The impact of IFRS to the Corporation at the transition will depend on the IFRS standards in effect at the time, accounting elections that have not yet been made, and the prevailing business and economic facts and circumstances.
